

IG7600

Smartphone Business Communication System

Turns smartphones into your office extensions

Perfect choice for any Small Business with 2 to 50 users

The IG7600 is a stand-alone Business Communications server for small and medium Enterprise. The Gateway and associated M54 App can turn users' smartphones into system extension phones. Anywhere in the world if there is WiFi or 3G(4G) mobile data coverage, users' smartphones can access all 8 PSTN lines at the IG7600 and enjoy all business communications functions such as multi-line use, intercom calls, Hold, Transfer, Conference, Voice Mail, Auto-attendant, and many more.
